consent

how can you get consent?

1. the person initiating sexual activity should seek consent of the other
2. ask yourself if the other person is capable of giving consent. if they are drunk, or on drugs, asleep or unconscious, they cannot choose freely. so, they are not giving you consent.
3. people who live with certain mental health issues, learning disability or a head injuries may not have the capacity to consent. do not assume that their consent is full and free.
4. confirm if you have consent by asking them. never assume. check with them each time you start a new type of sexual activity.
